AMENDMENTS TO THE CLAIMS:

This listing of the claims will replace all prior versions, and listings, of the claims in this application:

Listing of Claims:

1. (Currently Amended) A method ~~of user data entry, at a terminal, for communication to a remote destination~~ comprising:
 - a) displaying to a user at least one data entry field on a terminal for communication to a remote destination at least one data entry field to a user;
 - b) selecting the at least one data entry field through a user input;
 - c) automatically displaying a user selectable icon in proximity to the at least one data entry field in response to user selection of the data entry field;
 - d) selecting the user selectable icon through another user input;
 - e) in response to the selection of the user selectable icon, calling a security routine of an electronic wallet application which prompts the user for a password; and
 - f) upon successful entry of the password by the user in completion of the security routine, granting access to the user to the an electronic wallet application for transfer of data into the data entry field.
2. (Original) A method as claimed in claim 1, wherein the wallet application includes a secure collection of personal data.
3. (Original) A method as claimed in claim 2, wherein at least some of the personal data is for completing an electronic commerce transaction.
4. (Original) A method as claimed in claim 1, wherein the terminal is an Internet terminal.
5. (Original) A method as claimed in claim 1, wherein the terminal is a handheld mobile Internet terminal.

Serial No.: 10/606,177
Art Unit: 3625

6. (Original) A method as claimed in claim 4, wherein the remote destination is an electronic commerce server.

7. (Currently Amended) A method as claimed in claim 4, wherein steps a), ~~b)~~ and c), and e) are provided by a browser application.

8. (Canceled).

9. (Previously Presented) A method as claimed in claim 1, further comprising displaying the user selectable icon in a position adjacent the data entry field.

10. (Canceled).

11. (Canceled).

12. (Canceled).

13. (Previously Presented) A method as claimed in claim 1, further comprising automatically transferring data from the electronic wallet application into the data entry field, in response to user selection of the icon.

14. (Previously Presented) A method as claimed in claim 1, further comprising providing for user selectable transfer of data from the electronic wallet application into the data entry field, in response to user selection of the icon.

15. (Canceled).

16. (Currently Amended) A computer readable medium encoded with a computer program comprising: a) computer code for displaying at least one data entry field on a terminal to a user

Serial No.: 10/606,177
Art Unit: 3625

where the terminal is configured to communicate with a remote destination; b) computer code for processing a selection of the at least one data entry field by the user; d) computer code for automatically displaying a user selectable icon in proximity to the at least one data entry field in response to user selection of the data entry field; e) computer code for processing a selection of the user selectable icon by the user; f) e) computer code for calling a security routine of an electronic wallet application in response to the selection of the user selectable icon; and g) d) computer code for providing, to the user, access to the an electronic wallet application, for the transfer of data into the data entry field in response to successful completion of the security routine.

17. (Currently Amended) An apparatus comprising:

a display;

a user input interface for selection of a data entry field and a displayed icon; and

a processor operable :

to control the display on the apparatus of the data entry field;

to detect the user selection of the a displayed data entry field by the user;

to provide a user selectable icon automatically in the display in proximity to the data entry field, in response to the detection of the user selection of the displayed data entry field;

to detect user selection of the displayed icon;

to call a security subroutine of an electronic wallet application upon detection of the user selection of the displayed icon; and

to grant access to the an electronic wallet application from a remote location to the apparatus for transfer of data into the data entry field upon successful completion of the security routine by the user.

18. (Currently Amended) A method ~~of user data entry, at a terminal, for communication to a remote destination~~ comprising:

(a) displaying on a terminal for communication to a remote destination at least one data entry field to a user;

Serial No.: 10/606,177
Art Unit: 3625

- (b) selecting the at least one data entry field through a user input;
- (c) detecting user selection of the displayed data entry field;
- (d) automatically detecting whether a wallet application is enabled;
- (e) displaying an icon in proximity to the at least one data entry field, for user selection, if an electronic a wallet application is enabled, and not displaying the icon if the electronic wallet application is not enabled;
- (f) selecting the icon through another user input;
- (g) calling a security routine of the electronic wallet application in response to the user selection of the user selectable icon in which the user is prompted to provide a password; and
- (h) providing access to the electronic wallet application, for the transfer of data into at least the data entry field, upon successful completion of the security routine.

19. (Previously Presented) An apparatus according to claim 17, wherein the apparatus comprises a data entry terminal for communication of data entered by the user to a remote destination.

20. (New) A method comprising:

displaying a data entry field on a user interface of a terminal;

activating the data entry field through one of 1) a keystroke and 2) a cursor positioned over the data entry field and activating a selection mechanism;

upon activating the data entry field, displaying a wallet activation icon in proximity to the data entry field;

partially invoking the wallet application by selecting the wallet activation icon by one of 1) a keystroke and 2) a cursor positioned over the data entry field and activating a selection mechanism;

upon partially invoking the wallet application, displaying a security dialog box with a data entry field via an initial start routine of the invoked wallet application for entry of a valid secret;

upon successful entry of the valid secret in the data field of the security dialog box, fully activating the electronic wallet application such that a wallet user interface is displayed;

selecting a wallet section of the wallet user interface; and

Serial No.: 10/606,177
Art Unit: 3625

filling the data entry field displayed on the user interface from the selected wallet section.
